SPONGEBOB

Program Components:
Python Files:
- File to run Flask and serve info
- File to store/edit/retrieve info from database (SQLite)

CSV Files:
- Organized tables – later transferred to database?
- Ex:

ChaR	SB	PAT	SQUID	SAND	KRAB	PLAN	GARY	Ms. puff	pearl	karen
Home	Pineapple	rock	stone head	aquarium	krusty krab	chum bucket	pineapple			chum bucket
var										

Website Map:
- Index.html (Homepage)
    - Displays title
    - General info on the show
    - Directory/Links to all other pages on the wiki (Characters, Locations)
        - Subpages with more detailed information on their respective topics and could possibly have more references to other pages, which can just be a hyperlink to an episode or character referenced.
- <Character>.html
    - Adjusted according to each character's name
    - Same template/sections
        - (Biography, Appearance, Occupation, etc.)
    - Insert a picture of character
- <Location>.html
    - Adjusted depending on what the location is
    - Should have a general template too, with images, characters housed/building purpose, etc
- <Music>.html
    - The specific character that the theme song belongs to
    - Musical stuff I am going to copy paste because I'm not a musician
- Other pages we haven't thought about

TO-DO LIST/ASSIGNMENTS:

Prattay:
- Working on python files to connect to Flask, serve and retrieve data

Jacob:
- Working mainly on front end (html files)

Jeremy:
- Creation and management of database thru csv and SQLite
